OUR GREENHOUSES

VIEW **OUR OPEN HOUSE**

Our April Open House was a full house event with Antonio's Pizza slices free to visitors. See all the great photos

DURING THE GROWING SEASON

Annuals, perennials, tropical plants, and a dazzling array of hanging baskets.

FOR YOUR VEGETABLE GARDEN

Herb and vegetable plants are available along with large potted tomato planters.

TREES AND SHRUBS

We have a wide assortment of trees, shrubs and bushes to add color and beauty to your yard all year around .

Our campus includes 12 buildings, 7 of which are greenhouses, containing over 15,000 feet of growing space that includes many specialty plants and hanging baskets. Our 23,000 sq. feet state-of-the-art greenhouse contains both display and growing areas, kept perfectly ventilated and thermostatically controlled. When it gets warm, the roof opens to release the hot air.

Our Greenhouses are bursting with colorful blooms and veggie plants.

In the spring, we have spring bulbs growing, like tulips, hyacinth and daffodils, crocus and other bulbs. In March, we begin planting our geraniums, combination baskets and planters. We start taking customer orders for their special requests and get ready for our Annual April Open House Garden Party. During the fall, we offer perennials and beautiful mums, along with decor like Indian corn, cornstalks, pumpkins and gourds. Don't forget the straw bales. In the winter, we're planning for spring planting, and continuing to grow lots of basil, greens and other vegetables for the restaurant and retail markets as well as for customers who want fresh, locally grown produce, all year around.
